

Print out this pattern on cardstock or construction paper.

Cut out the pattern and fold up the rectangular sides to create a petal-like pattern around the hexagon.

You may wish to fold up the sides before you begin your design to see how the finished product will look. After you have conveyed your ideas onto your hexagon, you can apply tape on the outside tape of the petals to hold these in place.

Note: if you plan on creating a tessellating structure with multiple hexagons, simply trim off the rectangular sides to eliminate the petals.

If you choose to not convey a personal message on the memorial candleholder, you may wish to use the template below, which includes "the YIZKOR project" pledge.

I remember
We remember
I will remember
We will remember
